3. FREQ (Frequency): Use the appropriate frequency code to show the number of times per day that the medication was given.

PR = (PRN) as necessary
1H = (qh) every hour
2H = (q2h) every two hours
3H = (q3h) every three hours
4H = (q4h) every four hours
6H = (q6h) every six hours
8H = (q8h) every eight hours

5. DRUG CODE: Enter the National Drug Code (NDC). The last two digits of the 11-digit NDC define package size and have been omitted from the codes listed in the manual Appendix E. If using this Appendix, the NDC should be entered left-justified (the first digit of the code should be entered in the space farthest to the left of the NDC code column). This should result in the last two spaces being left blank.

1. Medication Name and Dosage	2. RA	3. Freq	4. PRN-n	5. NDC Codes
